

Tree ID Vocabulary Sheet

Use the pictures below and definitions overleaf to help you use the tree ID key...

Blade - the broad, flat part of the leaf

Leaflets - small blades on 1 stalk that make up one leaf

Lobe - a roundish division of a leaf

Mid-rib - the central rib of a leaf

Needle-like leaves - e.g. the needle-like leaves on pine trees.

Rib - another name for the vein of a leaf

Stalk - the supporting part that attaches the leaf to the tree

Toothed edge - serrated, knife-like edge

Vein - a strand of tissue that forms the framework of the leaf
